*March 23-27*

## Health Records

It's Health Information Professionals Week! So here is a big shout out to our two "HIP"s, Sandy & Deep! HIPs are certified professionals who specialize in health information management (HIM). At RLMCMH, they are responsible for managing health information, analyzing data, maintaining confidentiality, and working with medical staff and other providers to ensure the delivery of quality care.

Team Lead, Sandy Litwin, has been working in our Health Records Department since 1990! In 1991, she completed her education via the Canadian Hospital Association. With thirty years of practical knowledge, we couldn't ask for a better Health Records Team Lead. Sandy is also known for having a good sense of humour and knows lots of jokes. Deep Kapadia is brand new to a career in HIM; he just graduated from Fleming College — We're so grateful that he wound up in Red Lake...he's really had to hit the ground running and is doing a terrific job! Keep smiling Deep!

If you get a chance to peek into Health Records this week, please thank our HIP Team for their contributions to our Hospital.
